

CYBER SCHOOLED APPLICANTS

Cyber-schooled applicants are students who have completed their high school education either in part or completely at home via online learning programs. The programs are typically done in conjunction with a high school in their school district and must be approved by that school.

Curricular requirements are the same for cyber-schooled as for ‘regularly’ schooled applicants, generally:

- 4 years English
- 3 years mathematics
- 3 years science
- 3 years social studies
- 2 years arts and humanities

However, students applying to University of Pittsburgh professional schools, like engineering, business, and nursing, must also fulfill the specific requirements of those schools.

As with other applicants for admission to the University of Pittsburgh, each cyber-schooled applicant is evaluated individually based upon required academic coursework and satisfactory standardized tests (SAT I or the ACT).

To support the admissions application, we need:

1. a cyber-school transcript and, if applicable, a transcript of courses taken in high school prior to enrolling in cyber school
2. a letter from their high school approving the cyber school ‘plan’ and agreeing that a diploma will be awarded if and when the classes are satisfactorily completed.
3. in some cases, the Admissions Committee may require course descriptions of all classes taken.
4. the SAT I or ACT test results

Students will be required to provide a final, official high school transcript showing date of graduation, a requirement noted on the admissions application just above the student’s signature. Students who do not provide this will not be able to register for their second term, nor to graduate.
